

"Love is the source of life."

Facts of some important actions carried out by a team of [INTER]national Postmasters from 2020 to present:

- **1:** In October 2023, a visit to the Vatican was made, during which a document was handed over to the House, aimed at quickly securing the sovereignty of the world's population. This was all related to the Balfour Declaration, which expires on October 30, 2023. This marked the first step in preventing the WHO from becoming the master over world citizens and turning them into slaves. A citizen (strawman = fictitious creation on paper with a digital registration) is simply explained as someone who cannot write, speak, or read, while a living human being, who breathes and consists of living flesh and flowing blood, enjoys protection under twelve (12) universal human rights.
- **2:** In October 2024, alarm bells are ringing due to worrying reports from America that they have now found something to push through what previously failed. This is also seen worldwide in the resistance against local, regional, and national governments. On September 22, the United Nations silently signed a treaty to initiate a global transformation to place the world under a single government, categorizing all living people as world citizens. Subsequently, these individuals would be registered with an AI system that recognizes your fingerprint, facial features, and eyes biometrically, placing you under a social credit system. An AI that then determines whether you can still work, go on vacation, cross borders, or if you will be placed in a re-education camp against your will. All your rights will be stripped away.

As Postmasters, we have taken action regarding this silent treaty, which is in effect for the "Elite-UN/VN" after thirty (30) days of full legal force. This treaty must be stopped and corrected retroactively, but we are not yet done. We provide you all with a shortened English version for yourself, which allows you to tell the government after signing: this is not what we want. Your UN - EU - WHO - Bilderberg - WEF, etc., rules are not my rules, and you have not asked me, as a living woman or man, for any permission...

The shortened document (in English) has been specifically created for you as a living person to file an objection with local, provincial, and national authorities, stating that you do not agree to be placed under a social credit system as a world citizen. To legalize the document as a living human being, you will go to the last page:

- Write in the middle under the word "**General Executor**" with a **red pen** your full name in lowercase (first name and last name), slanted to the right, for example: **barbara john, smith** (slanting and writing them together). If you have a red stamp pad, you should place your thumbprint on your first name, sealing it with **red ink** as your **DNA blood seal** on your legalization as **General Executor**.
- Write on the dotted line next to the word "**Signature**" with a **green pen** your signature. This is your **nature-law** right sealing as a living human being.
- **Send a copy by post, email, or deliver it personally to your local, provincial, or national government and their employees: National Politics: General Affairs, moved from Binnenhof 18-19 to temporary Turfmarkt 147 - The Hague, GGD, Police, General Practitioner, Municipality, Province, etc.** (keep the original at home).

Best regards,

:eric-johannes-barbara, geurts.
